Terms of Service: Policy: Nov 19, 2020 Version 7.2.011 Online Search Function now! Go to the filter store to find more filters! If you have any questions or issues, please contact us at: support@beautyplus.com Although the child can use this application because it is very easy to use. You can pay a membership but I never did it again I loved it so much. It has automated features and manual features that allow you to fix the picture within a minute, looking completely realistic. This isn't one of those rubbish apps that makes your eyes bigger they look fake. The app is very realistic and professional. You can tell that the company cares about its customers because it has a variety even for non-paying users. A little retouch doesn't hurt anyone. If you're a little creative, you can take some tools beyond their original purpose. For example: Get food on your teeth? Disappears with acne tools. Your smile looks weird? Fix it with a thin tool. And guess what! No watermarks or advertisements. Trust me, you won't regret getting this app. I've been really crazy with this app since I downloaded it over the last few days. I can't get enough of it! My daughter and I want to just have where we could do a selfie and I started originally with MakeupPlus. Then we downloaded this so we could do it together and we just kept downloading other apps made by the same company! Me and our family love it! I certainly like where you can already make him make done without really having to do it! Besty Filter is great for my daughter and I, husband and me, husband and daughter, just everyone We honestly got it where we'd print this much for the Christmas show, at least some of them! Thank you for creating such an entertaining app and please keep making it! If you don't like this, you won't be disappointed :-) The app is better at what's done than any other app of the same type that I've tried. You don't need half a dozen apps to make your photos look good—only one app does it—and they don't force watermarks all over your stuff. I am a very satisfied customer. My only complaint was lagging behind. Sometimes slow to load, slow react, slow to take pictures or videos, etc. That could be my internet or it could be the size of the app. I still love this app anyway. I remember the old saying: sometimes, less more—I find that you don't have to use a powerful filter to get nice results. This is an ideal application for phones that have unwavering cameras. It captures the best of everyone, from newborns to more than 80. BeautyPlus Premium – Official photo app App Support Policy from Google Edit and adds thousands of effects to your photo Adobe Photoshop Lightroom An elegant way to sort your photos a fun way to take a selfie of the official Google Camera App professional photography editor Edit and animated videos on your smartphone smartphone
